

GERMANS SINK NORWAY SHIPS

TEUTON REPORT DECLARES BRITISH ARE AGAIN BEATEN IN CLASH NEAR YPRES.

GREECE READY FOR WAR

GERMANS POUR TROOPS INTO FLANDERS TO FOLLOW FIRST SUCCESS IN SPRING CLASH.

Western Newspaper Union News Service.

London, April 26.—The crews of the Norwegian barks Oscar and Eva were landed at Hury Island, Scotland, by the steamship Anna flying the Danish flag. A German submarine overhauled the barks about 170 miles northeast of Longstone and allowed their crews ten minutes to board life boats. The submarine then shelled the vessels.

Subsequently the German submarine stopped the Danish steamer Anna, and ordered her to take aboard the crews of the Oscar and Eva. The barks were bound for Scottish ports.

The Norwegian steamship Capri, which sailed from Baltimore April 6 for Christiania by way of Ardressan, Scotland, struck a mine at a point fifteen miles northeast of Tory Island, and sank, according to a dispatch received here by Lloyd's Agency from Inishtrahull, Ireland. The crew of the Capri was landed at Inishtrahull.

The Danish steamer Nidaros, 631 tons net, has been captured by a German warship in the North Sea, and taken into port at the Island of Sylt, one of the North Frisian Islands. The Nidaros sailed from Aarhus, Denmark, with a cargo of agricultural products.

The freighter Ruth was sunk by a German submarine when about 100 miles east of May Island in the North Sea. The crew was rescued and landed at Leith, Scotland. The Ruth left Leith with a cargo of coal for Gothenburg. Captain Anderson, her skipper, who is a Swede, reports that the first torpedo discharged by the submarine missed its mark. The second torpedo struck the Ruth amidships, wrecking the vessel. The sixteen members of the crew were all Swedes. They drifted about in small boats for twelve hours before being picked up.

Christakis Zographos, foreign minister of Greece, is quoted by the paper Information, in Paris, as declaring that Greece was ready to unite with the allies in the operations at the Dardanelles if invited to do so.

The attack in Flanders has been transferred to the British lines held by the Canadians, and for two days the men from the Dominion have been engaged in a deadly contest with the Germans. The latter state in their official report that they have made further progress toward Ypres and that the British counter attack has been repulsed.

The French account declares that the allies' counter attacks continue with success and that the British hold all their positions, and repeats the charge that the Germans are using bombs containing asphyxiating gases.

Taking advantage of the flood conditions the German general staff transferred a large number of troops to the west. It is believed that 500,000 new German troops have reached Flanders, and that more guns and material are to be used than were provided in the original attempt to destroy the allied armies in the west.

ROCKEFELLER ASSAILS CRITIC

Declares Walsh Statement About Letters Unfair and "Indefensible."

New York.—John D. Rockefeller, Jr., gave out a statement in reference to the correspondence between himself and L. M. Bowers, chairman of the Colorado Fuel & Iron Company, which was made public by Frank P. Walsh, chairman of the United States Commission on Industrial Relations.

Mr. Rockefeller characterized as false the conclusion which Mr. Walsh drew from the correspondence.

Mr. Rockefeller asserts that Mr. Walsh had drawn inferences without ascertaining whether they were correct, a "proceeding which is wholly indefensible."

He said further that he would be glad to appear to give additional testimony before the commission at any time, "for we are desirous that the public shall have all the facts."

Bringing Sunshine to the Darkest Day

Mean Thing.

The bride was weeping as if her heart would break. "That horrid Mrs. Patterson said she hoped my marriage would be a happy one," she sobbed. "That was very nice of her," said her mother. "I don't see why you should cry about it."

"But she said it as if she felt perfectly sure it wouldn't be."

Prohibited.

Post Office Clerk—You can't mail those coins in a letter. You ought to know that.

Stranger—Well, what am I going to do? You've got a sign outside that says "Post No Bills."

New Derivation.

Teacher—Give the origin and definition of the word renovate.
Pupil—Renovate comes from the word Reno, and means to make over marriages.

The Last Resort.

"There's no place like home," mused the philosopher.
"After all," echoed the toper.

A married man's idea of leisure is the few seconds' rest he gets while his wife is hunting up something else for him to do.

Left Him Pondering.

Willie was of an economical turn of mind. He called upon Elizabeth many times before he bought her a box of candy. At last he loosened up and bought an 80-cent pound box.

That evening his brother noticed that he had a "grouch" on and asked the trouble.

"That blamed old cur ate half of that box of 80-cent candy," he said, referring to Elizabeth's scotch collie.

The next time he bought candy he bought, in addition to another 80-cent pound box, a bag of ten-cent store candy for the dog.

"Oh, William!" said Elizabeth. "How thoughtful of you. I am so glad that you and Rover are becoming friends."

UTILIZE A NATURAL POWER

Volcanic Steam Found Valuable in Italy for a Variety of Useful Purposes.

Clouds of sulphurous vapors fill the air in the region about Lardarello, in northern Tuscany, Italy, and the odor of hydrogen sulphide is plainly noticeable for miles around. Many hot springs are also to be found in this volcanic region and numerous jets of steam at pressures as high as three and a half atmospheres and with temperatures up to 750 degrees F. flow from fissures and crevices in the earth. The springs of the region and this steam are strongly impregnated with boric acid, which is extricated at Lardarello in a plant which utilizes the steam for generating power and for supplying heat in the various processes in which heat is required.

In the generation of power at the boric acid plant the steam is conducted into low-pressure cylinder engines which drive the various kinds of machinery in use. A similar engine is used for driving a dynamo which generates electricity for lighting the plant and the homes of the people living in the vicinity. The natural steam is also used by the people of Lardarello for heating and cooking purposes. It is now believed that the heat of the steam will soon prove to be of greater value than the boric acid produced.—The Pathfinder.

Torturing Twinges

Much so-called rheumatism is caused by weakened kidneys. When the kidneys fail to clear the blood of uric acid, the acid forms into crystals, like bits of broken glass in the muscles, joints and on the nerve casings. Doan's Kidney Pills have eased thousands of rheumatic cases, lumbago, sciatica, gravel, neuralgia and urinary disorders.

A Colorado Case

L. M. Drake, 530 W. Fourth Ave., Denver, Colo., says: "I thought I was going to die from kidney trouble. My feet were so badly swollen I couldn't wear my shoes and for months I couldn't work. Doctors failed and it was left for Doan's Kidney Pills to cure me. I haven't had a sign of kidney trouble since."
